

WEBINAR

District and school leaders: How to use data to engage teachers in high-growth strategies

map GROWTH

Poll: How do your teachers react to new initiatives in your district?

- A. With fist pumps and open arms.
- B. Cautious optimism.
- C. A small few embrace it, others resist or ignore.
- D. Mutiny.

Picture this.

Can you make it worthwhile for teachers to try something new?

IS IT SAFE?

“Am I putting myself at risk by trying something new?”

IS IT IMPORTANT?

“Does this matter?
If I don't do it, will
there be any impact?”

BELIEF THEY CAN DO IT

“Are the right conditions in place for me to succeed at this? Do I have both autonomy and support?”

THERE IS A CLEAR, LASTING BENEFIT

“I know what will change for the better if I do this. I understand how it leads to better recurring outcomes.”

What you'll learn today

Culture

Process & Support

Data Conversations

Why Schiller Park?

700,000 students in

24,500 schools present in

our MAP Growth assessment

789 schools that produce high growth year-after-year for students across achievement levels

Transformative Ten

- Researchers spent over 75 hours observing and 12 hours interviewing teachers
- Documented ten effective instructional practices that can be used in any grade or subject

When teachers across multiple schools are consistently embracing data, experimenting with new strategies, and growing kids above expectations, what do you have?

A great leadership team.

Today's Presenters

Dr. Kim Boryszewski

Superintendent
School District 81
Schiller Park, IL

Melissa Kartsimas

Principal
Kennedy Elementary School
Schiller Park, IL

Constance Stavrou

Principal
Lincoln Middle School
Schiller Park, IL

About Schiller Park

K-8

Two elementary schools

One middle school

1,500 students

students in the district are non-white

students receive free or reduced-price lunches

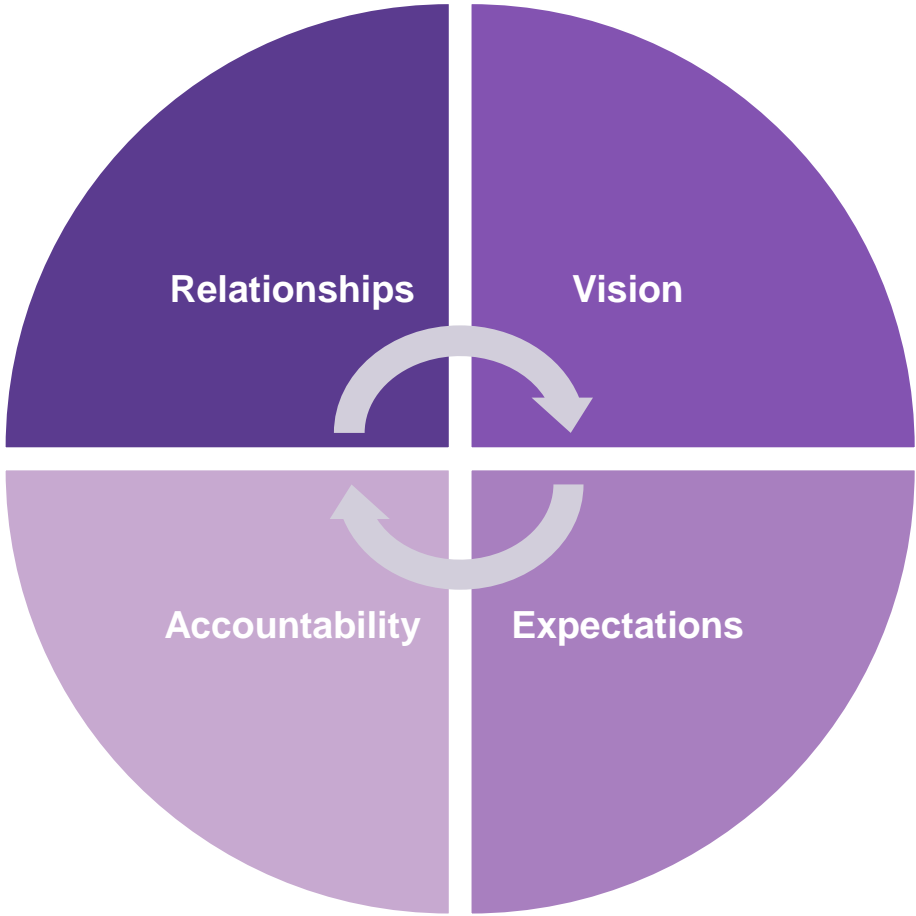

decrease in district's per-pupil spending

CULTURE

Who we are

map GROWTH

Culture foundations

First the relationships. Then the heavy lifting.

Take off the mask

Leading with vulnerability
can establish trust

Discover their why

Understanding what
motivates your staff helps
you become the leader
they need.

Set shared
goals together

Creating a common
purpose you're all working
towards together means
no one feels isolated.

Focusing on relationships first fosters mutual trust, creating a safe environment for teachers to engage deeply.

Setting a vision

Connect

Empower

Inspire

Vision: The big ideas

01

We're in this
together

02

Meet every kid
where they are at

03

All kids are
our kids

Setting expectations

Moving together with purpose

Expectation No. 1

We talk about data early and often

Expectation No. 2

Data is a tool, not a weapon

Expectation No. 3

Every teacher has a professional growth goal involving MAP Growth data

Expectation No. 4

Collaboration is a must—open walls and open communication!

Expectation No. 5

Our classrooms are dynamic places where students own their data.

Accountability

A mutual commitment to upholding our culture.

Accountability: The big ideas

01

We don't shy away from tough conversations

02

We approach evaluation with integrity

03

We take action when we know a change is necessary

Poll: What's the state of your school or district culture?

- A. It's thriving
- B. Solid, but has areas to shore up
- C. We have major concerns
- D. Please send help!

Process & Support

mapGROWTH

Why we invest (and continually
reinvest) in our teachers.

Key efforts

Professional
development &
continuing
education

New teacher
induction
program

School
improvement
days

Weekly common
planning time

Direct
instructional
support

Embedded professional learning

Supported early and often
with opportunities for
learning while doing

Mentor teacher

Getting the benefit of
experience without the
pressure of a supervisory
relationship

Instructional coach

Targeted development of specific skills in the context of their own class

Leadership support

New teachers see leaders working along side them in the classroom, PLCs, and beyond

Celebration!

Intentionally
celebrating mentorship,
growth, and success

School Improvement Days

01

Setting SMART goals as teams

02

Review and discuss data

03

Plan adjustments to instruction, student groupings, curricula, etc.,

Weekly common planning time

Carving out space for collaboration

Coordinating early release

Protecting integrity of the time

Leaders actively participate

Direct instructional support

DATA CONVERSATIONS

- Regularly scheduled, structured inquiries into data

OBSERVATIONS

- Mentors, instructional coaches, and principals

OPEN DOOR POLICY

- Leaders always make time for ad-hoc, 1x1 conversations

Data Conversations

mapGROWTH

A row of green lockers with a teal overlay. The lockers are arranged in a single row, and each has a small handle and a lock mechanism. The text is centered over the lockers.

Structured, intentional conversations about data are the key to taking action.

Talking data at every level

Board of
education

District
and school
leaders

Principals
and teachers

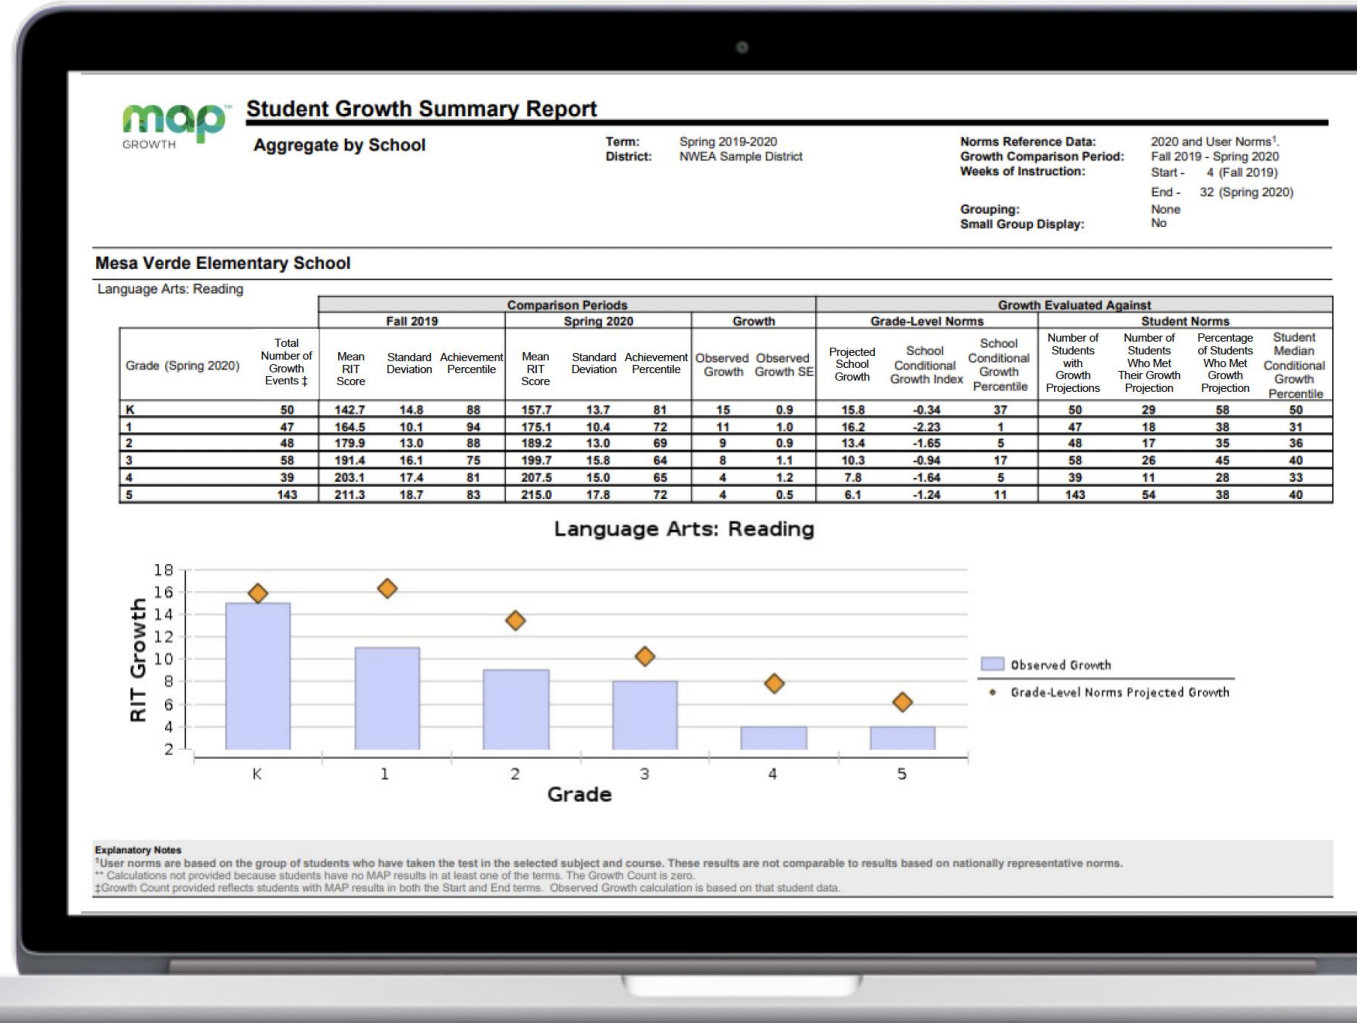

Teachers and
students

Data and
innovation

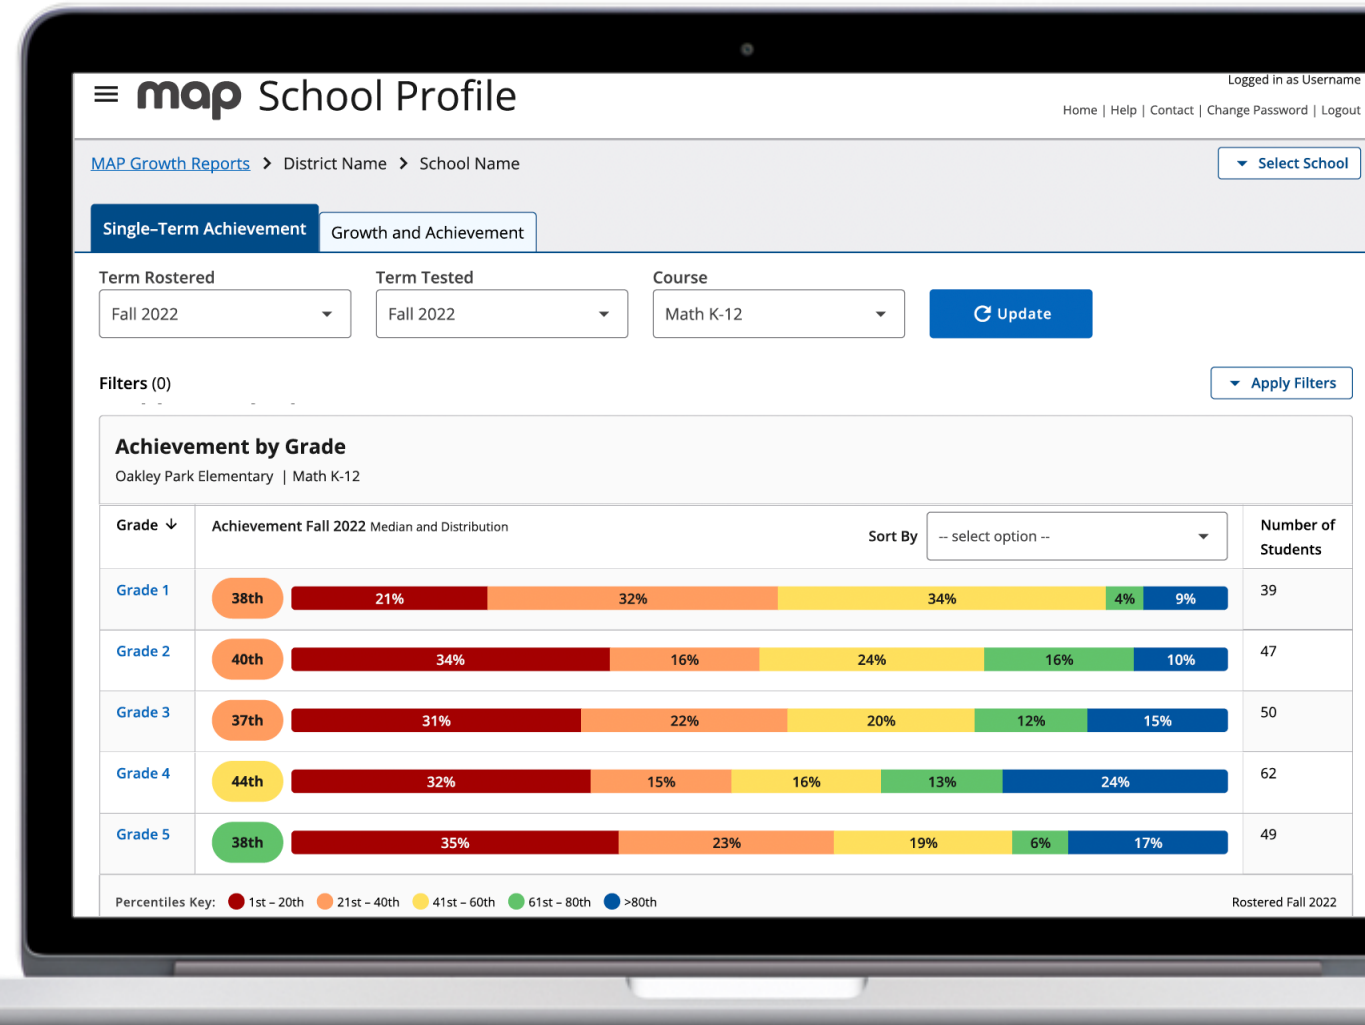

Board of Ed

- Share data regularly
- Where are we succeeding?
- What needs more attention?
- What actions are we taking?

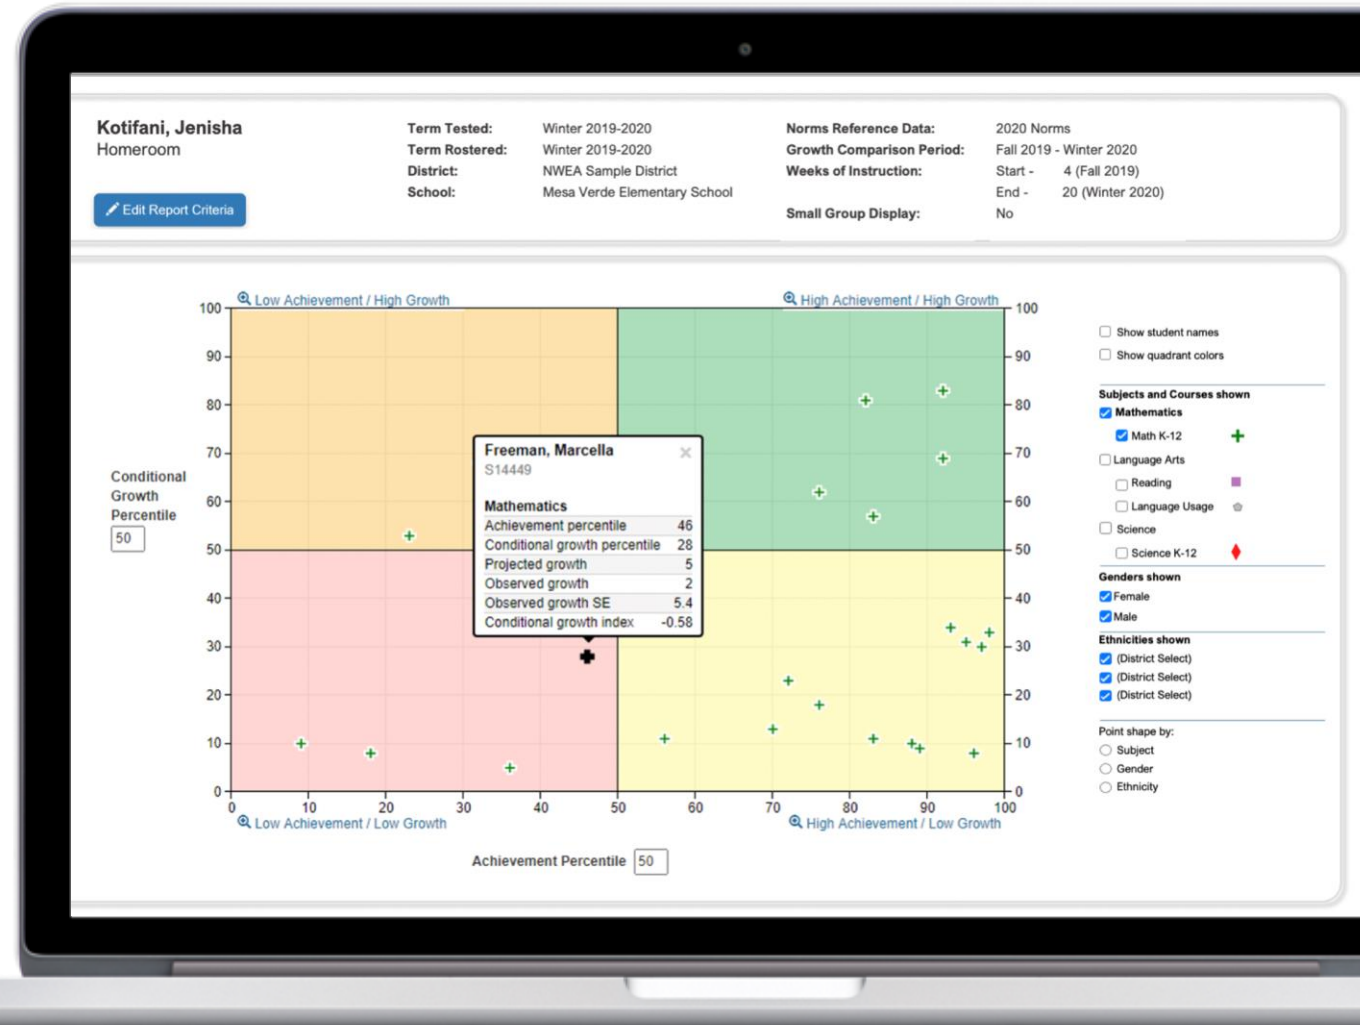

School and district leaders

- Where are we succeeding?
- What are the areas of concern?
- Who is impacted?
- What actions do we need to take?

Principals and teachers

- Are there any surprises?
- Do other data support these results or raise questions?
- What strategies could work, particularly with outliers?
- What resources do you need?

Teachers and students

- What successes can we celebrate?
- Where do we want to focus improvement?
- Are you on track for where you want to go?
- What commitments can we make together?

How the Learning Continuum helps educators:

1. Help educators understand what kind of content is being assessed at various difficulty levels within the item pool
2. Enable educators to better understand the content of questions students are likely getting right and wrong about 50% of the time
3. Save educators time by acting as the starting place to inform formative strategies designed to identify skill gaps at the student, group, and class level

The screenshot displays the 'map Learning Continuum' interface. At the top, it shows the user is logged in as 'Aaliyah Schwartzreich' with navigation links for Home, Help, Contact, Change Password, and Logout. Below the header, there are filters for 'Test' (set to 'Demo Growth: FL 2020 Math 6+') and 'Grade' (set to '— select grade(s) —'). There are also radio buttons for 'Group by Standard' and 'Group by Topic' (which is selected). A horizontal bar below the filters shows difficulty level ranges: 181-190, 191-200, 201-210, 211-220, 221-230, 231-240, 241-250, and 251-260. Two panels are open, one for 'RIT 181-190' and one for 'RIT 191-200'. Each panel lists content areas: 'Operations and Algebraic Thinking', 'Number and Operations', 'Measurement and Data', and 'Geometry'. Below these, a 'Represent and Solve Problems' section lists specific standards and their descriptions, such as 'MA.6.NSO.2.1: Recall addition facts with sums to 10 and related subtraction facts with automaticity' and 'MA.7.NSO.3.2: Add two one-digit whole numbers with sums from 0 to 10 and subtract using related facts with procedural reliability.' Each standard includes a bullet point: 'Adds whole numbers with sums within 20'.

The background is a green-tinted image of an abacus. It features various mathematical terms and numbers. At the top, the word "TENS" is visible. Below it, the numbers "8" and "2" are prominently displayed. Further down, the text "NUMBERS ON DECIMAL POINT FRACTION OF" is visible. At the bottom, a mathematical expression $1 + 0.700 + 0.030 + \dots$ is partially visible. The overall theme is mathematics and data.

Data and innovation

A modern, open-plan educational space, likely a library or student center, with students working at tables and in lounge areas. The room features a high ceiling with recessed lighting, large windows, and a mix of seating options including armchairs and tables. The entire image is overlaid with a semi-transparent green filter.

Be consistent. Improvement will follow.

Conclusions

Start with relationships
and culture

Provide structure and support

Harness the power of data to
drive the right conversations
and actions

The background is a vibrant green with various geometric elements. There are several overlapping circles in different shades of green. Scattered throughout are white plus signs of varying sizes. A prominent feature is a large, semi-transparent circle on the right side, filled with a white dotted pattern. In the top left, there is a small yellow horizontal line.
